Authorized to work in Canada: 3-year Post-Graduation Work Permit (PGWP) from Aug. 2026, no sponsorship required

EDUCATION

- Master's in Applied Computer Science** | *Concordia University, Montreal, Canada* Jan. 2025 – Aug. 2026
- Relevant Coursework: Distributed System Design, Advanced Programming Practices, Algorithm Design Techniques, Applied Artificial Intelligence, Software Project Management, Programming and Problem Solving
- Bachelor's in Information Technology (GPA: 8.51/10)** | *Coimbatore Institute of Technology, India* May 2024

PROJECTS

- ToWin** | *Spring Boot, Kafka, Claude Code, MCP, React* Mar. 2026 – Present
- Elder Safety and Trust-Based Social Platform* | 🐙 [GitHub](#) | 🌐 [Live Website](#) |
- Architected and shipped an event-driven backend (modular monolith) in **Java 21** and **Spring Boot**: **83 REST endpoints** across **18 controllers**, **14 JPA entities**, and **36 Flyway migrations**, with **Apache Kafka** producers and consumers for connection and trust-progression events, owning every architectural decision on a solo **722-commit** build.
 - Designed a custom AI-accelerated workflow using **Claude Code** with specialized sub-agents, **custom MCP servers**, and tailored Skills and plugins for Spring Boot scaffolding, JPA mapping, and JUnit generation.
 - Automated **255 JUnit and Mockito tests** and AI-driven code review through sub-agents, then ran SonarQube static analysis and Snyk dependency scanning through GitHub Actions workflows against OWASP Top 10 risks.
 - Built supporting infra with Redis caching for Haversine geospatial discovery, AWS S3 for media and ID documents, PostgreSQL + Flyway migrations, Spring Security with OAuth2/OpenID Connect and JWT, RBAC, a **7-stage** mutual-consent trust system, WebSocket chat, Twilio SOS alerts, and Docker Compose.
- Quiz Studio** | *Spring Boot, Spring Security, JWT, React, PostgreSQL* Feb. 2026 – Present
- Student-Teacher Role-Based Quiz Application* | 🐙 [GitHub](#) | 🌐 [Live Website](#) |
- Delivered a production-ready, full-stack quiz platform using **Spring Boot**, React, and PostgreSQL with role-based access for Teachers and Students, deployed live on Railway and Vercel, and enforced quality with JUnit, Mockito, and GitHub Actions CI/CD.
 - Secured all API endpoints with Spring Security and JWT, implementing a custom **JwtAuthFilter**, role-based access control (RBAC), and a guest login flow that issues scoped tokens without credentials.

EXPERIENCE

- Backend Developer** | *Vosyn, Remote, Canada* Apr. 2026 – Jul. 2026
- Worked on the team that owns VosynEnterprise's ad-serving integration, the monetization initiative tracked as a C-suite OKR; stood up the full multi-service platform locally with Docker Compose, validating PostgreSQL, Redis, and Kafka interoperation.
 - Built a **cache-aside Redis** layer for campaign and creative-metadata reads on the ad-delivery path with dual invalidation (event-driven plus a 60-second scheduled refresh), fronting an independently scalable ad-decision microservice on GCP Cloud Run.
- Data Assurance Analyst** | *Ernst & Young (EY), Chennai, India* Dec. 2023 – May 2024
- Improved financial assessment accuracy by writing and optimizing SQL queries across large datasets, directly supporting audit decisions made by senior Chartered Accountants at a Big Four firm.
 - Cut manual reporting effort by streamlining audit workflows with Alteryx and Excel, delivering audit data reports for 2–3 client companies per day across concurrent engagements.

TECHNICAL SKILLS

AI & Tooling: Claude Code, Claude Sub-Agents, Agentic Workflows, Custom MCP Servers (MCP), AI API Integration (Anthropic), Generative AI, AI Output Evaluation, Responsible AI, GitHub Copilot, Prompt Engineering, LLM Fundamentals, Computer Vision (PyTorch, InsightFace)

Languages: Java, JavaScript, TypeScript, C++

Backend: Spring Boot, Spring Data JPA, Hibernate, RESTful APIs, Microservices, WebSocket, Maven

Frontend: React, HTML, CSS

Databases & Messaging: PostgreSQL, MySQL, Redis, Apache Kafka, Flyway

Cloud & DevOps: AWS (EC2, S3, IAM), Azure, GCP (Cloud Run), Linux, Docker, Kubernetes, CI/CD Pipelines, GitHub Actions, Git, Pull Request Workflows

Security: OWASP Top 10, OAuth2, OpenID Connect (OIDC), Spring Security, JWT, RBAC, SonarQube, Snyk, Secure Coding

Practices: Data Structures & Algorithms, Agile/Scrum, Jira, SDLC, OOP, Unit, Integration & E2E Testing (JUnit, Selenium), Technical Documentation, Event-Driven Architecture

Spoken Languages: English (professional), French (beginner, enrolled in Québec government francisation program)

CERTIFICATIONS

AWS Certified Developer – Associate | [Verify on Credly](#)

INTERESTS

Reading Books, Journaling, Social Media Content Creation, Chess, Badminton, Meditation, Gym, Travelling
